

# DMPT Free Monomers

## Do you sell Monomers into the EU?

### DID YOU KNOW?

Dimethyltolylamine (N,N-DMPT) (CAS 99-97-8) is being reclassified under the EU's CLP Regulation (EC) 1272/2008 as a Category 1B Carcinogen, effective September 1, 2025.

Commonly referred to as DMPT or N,N-dimethyl-p-toluidine, this raw material is frequently used in monomer formulations. In California, chemicals associated with carcinogenic or reproductive harm, such as DMPT, are regulated under Proposition 65, which requires appropriate label warnings for such substances.

### AVAILABLE WITH FRAGRANCE TOO!

COFFEE

LILAC

LAVENDER

FRESH & CLEAN

PUMPKIN SPICE

## Stock Formulas Currently Available:

<b>G3M 1001714M</b>
C1 BLUE
C2 VIOLET
C7 LT VIOLET

<b>J2M 1001720M</b>
C1 BLUE
