STAMPING GEL HF

The hottest new addition to your nail art kit!

Stamping Gel HF is a clear gel that can be used in combination with your stamping plates and selections of pigments and chroles. After stamping the design onto the nail, rub chroles and pigments into the stamping gel to reveal your creation.

FEATURES & BENEFITS

- HEMA free
- Versatile – suitable for use over all nail systems.
- Infinite nail art creations – create embossed effects, combine stamping designs with chrome finishes, combine various colors in one design, and much more.

INSTRUCTIONS FOR USE

- Finish the artificial nail to the desired shape and length.
- Apply a coat of No Tack Top Gel. Place nails into the appropriate light and cure for at least 60 sec in a LED/UV lamp.
- Buff surface of the nail to remove shine, leaving a perfectly matte finish.
- Apply a bead of Stamping Gel HF to a stamping plate of your choice.
- Distribute Stamping Gel HF over the plate design with a scraping card.
- Press the stamper onto the stamping plate, picking up the design.
- Roll stamper onto the nail, transferring the design onto the nail.
- Place nails into the appropriate light and cure for at least 60 sec in a LED/UV lamp.
- Rub a pigment of choice onto the design using an application brush/eyeshadow brush. Dust off excess.
- Apply a coat of No Tack Top Gel. Place nails into the appropriate light and cure for at least 60 sec in a LED/UV lamp.

ProTip: Use a lint roller to remove excess Stamping Gel HF in between each application.

ProTip: Use a Cuticle Protect to prevent the gel from touching the surrounding skin.

WARNINGS/DISCLAIMERS

This product may thicken over time. Prolonged exposure to elevated temperatures can accelerate the thickening and negatively impact the application properties. This product must be kept in proper light-tight packaging.
