GUMMY COLORS GEL

HOW TO APPLY INSTRUCTIONS:

- Buff the natural nail to remove shine.
- Apply a coat of B-2 Nail Prep to the natural nails to dehydrate the nail plate.
- For best results, follow with a layer of Ultrabond of your choice and allow product to dry for approximately 30 seconds (product will remain slightly tacky).
- Apply thin layer of Gummy Color over entire nail surface being careful to avoid the gel running into the cuticle area.
- Place nails into the appropriate light and cure for at least 60 sec in a LED/UV lamp. Highly pigmented colors may require an additional cure.
- Apply a second thin layer of Gummy Color over entire nail.
- Place nails into the appropriate light and cure for at least 60 sec in a LED/UV lamp.
- Finish with a Keystone Top Gel of your choice, cure as recommended.

HOW TO REMOVE INSTRUCTIONS:

- File the top layer.
- Soak nails in Acrylic Remover.
- Remove fingers every 4–5 minutes and remove dissolved gel from the surface with a cuticle pusher or orangewood stick, being careful not to damage the natural nail.
- Repeat soaking until gel is completely removed.

Disclaimer:

- *Colors may vary slightly depending on the lamp used for curing. To ensure vibrant colors and optimal visual results, we recommend using a Dual Wave lamp.*
- *Gummy Colors are highly pigmented and are intended for used as a brush-on application and not a structure application. This will ensure optimal cure.*
